BACKLIT DISPLAYS

ISOFRAME[®]
LIGHT BOX 2.0

ISOFRAME® LIGHT BOX 2.0 - SEAMLESS LUMINOUS GRAPHICS

All Mark Bric products are manufactured with the highest standard of workmanship and the best quality of materials available. All products are constantly subjected to demanding quality control and designed to provide years of trouble-free use.

The ISOframe® Light Boxes are infinitely adaptable, increasing visibility and visitor attention in no time. These backlit displays are produced in durable, high finish aluminum and our patented FAST clamps create a tool-less and quick assembly. The pre-mounted eco-friendly LED lights settle the deal: The ISOframe® Light Box creates a high-end ambience to your exhibition participation.

Backlit displays.
Discover ISOframe® Light Box.

Our warranty is the best in the industry. But if something were to happen, we'd help you fast – no questions asked.

The products are quick and easy to install because the assembly is completely tools-free.

Experience our smart, simple design that allows you to flexibly work out the right expression for each fair.

We help you keep to budget, through effective products and responsive support.

Our products offer great graphics no matter what theme you choose for your next exhibition.

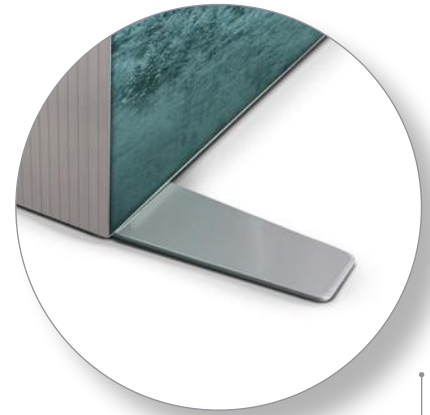

Our global presence gives you experienced local service, wherever you are.

ISOFRAME® LIGHT BOX 2.0 IN SHORT

This product is a part of the ISOframe® family, which makes it a perfect complement to other ISOframe® displays. Whether the display is featured in a store, as a trade show display or anywhere in between, light boxes are infinitely adaptable and they're sure to get you noticed.

The robust feet allow for large size freestanding light box applications. The silicon-edged fabrics create simple attachment of graphics and our patented FAST clamps mean quick and tool-free assembly. ISOframe® Light Boxes are available in a large selection of standard sizes, as well as customized sizes to order.

We are proud and stand behind this backlit display with the best warranty in the industry, 10 years, and no questions asked.

Stable and elegant feet for free-standing light boxes.

double sided
use

IDEAS OF HOW TO USE THE BACKLIT DISPLAY

Light boxes create a high-end ambience that's ideal for retail, fashion and trade show display booths. They're perfect for point-of-sale (let light enlighten your message or product photos!), luxury goods branding (enhance your logotype!) or destination travel ads (the sunny destination will seem even more tempting). Wall-mounted or free-standing – let your needs decide.

An ISOframe® Light Box truly adds that extra sparkle to your graphics.

Makes your message pop!

TAILOR YOUR EXHIBIT

Mount your display or keep it freestanding, combine units for massive exhibits or even display panoramic images, and as the display comes in numerous standard and customized sizes it allows you to tailor the graphic design. Also, the seamless, silicon-edged fabrics glide into their framework for amazingly simple setup no matter the layout.

ISOframe® Light Boxes can be used both single and double sided for increased visibility and visitor interaction.

ISOFRAME[®] LIGHT BOXES 2.0 - HOW DOES IT WORK

Portable design

Components transport safely in our shock-proof cardboard boxes with foam inserts. Highly portable and packs flat for shipping through UPS or FedEx. Padded carrying bags and cases are available if needed.

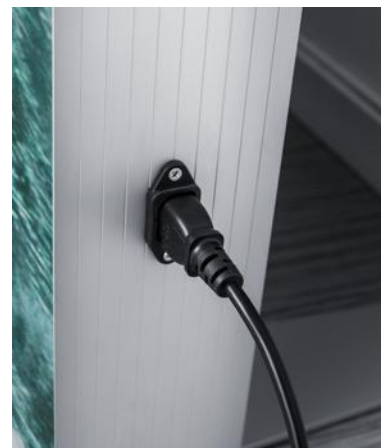

Self-build assembly

Simple and uncomplicated self-build setup and breakdown. The frame profiles with pre-mounted LED-bars are delivered in lengths of 100 cm and 50 cm and are easily joined together thanks to our tool-free FASTclamps and straightforward cable connectors.

Low energy footprint

Make a big impact on low voltage. These backlit displays rely on strong eco-friendly LED lights and transformers, which are pre-mounted inside the frame. One external cable lights up all.

LEARN MORE ABOUT THE ISOFRAME® FABRIC DISPLAYS

There's just something special about fabric when it comes to trade show displays. With ISOframe® Fabric we combined state-of-the-art printing, an elegantly engineered framework and silicon-edged fabric to create some of the most stunning trade show displays.

ISOframe® Fabric offers the possibility to create the largest exhibition displays with gorgeous, seamless graphics. Learn more about what the next generation of exhibit systems can offer, including how the Light box integrates with other ISOframe® displays. We'd be happy to show you the endless possibilities.
